Nucleic acids encoding secretory proteins/membrane proteins, useful in gene therapy or as candidate target molecules in drug development.
                Claim 1; SEQ ID NO 149; 609pp + Sequence Listing; English.
```

This invention relates to nucleic acid sequences AAF93744 - AAF93916
which encode human secretory or membrane proteins represented by AAB88317
AAF62232 - AAF62235 which are used to isolate the CDNA sequences of the invention. The invention also includes methods for the production of antibodies directed against the proteins, and CDNA sequences, which can be used in vaccines. The polynucleotide sequences can be used in gene therapy. The polynucleotide sequences and the proteins they encode may be used in the prevention, treatment and diagnosis of diseases associated with inappropriate secretory protein/membrane protein expression. The cused in the prevention, treatment and diagnosis of diseases associated with inappropriate secretory protein/membrane protein expression. The nucleic acids and complementary sequences may also be used as DNA probes in diagnostic assays (e.g. polymerase chain reactions (PCR)) to detect the presence of similar nucleic acid sequences in samples. They may also be used to study the expression and function of secretory proteins/membrane polypeptides and their role in metabolism. The proteins/membrane polypeptides and their role in metabolism and in assays to identify modulators (agonists and antagonists of antagonists of expression and activity. The antibodies may also be used as therapeutic agents to down regulate expression and activity. The antibodies may also be used as therapeutic agents to down regulate expression and activity. The antibodies may also be used as therapeutic agents to down regulate expression and activity. The antibodies may also be used as diagnostic agents for activity. The antibodies may also be used as therapeutic agents to down regulate expression and activity. The antibodies may also be used as therapeutic agents of diseases which may be executed include rheumatoid arthritis and diabetes

ო

```
The invention relates to an isolated cDNA encoding a protein that is differentially expressed in breast cancer, designated PDBBC. The invention is useful to diagnose breast cancer. The invention is also useful to stage, treat, and monitor progression or treatment of breast cancer, particularly an invasive, metastatic stage of the disease. The present sequence represents CDNA encoding human PDBBC incyte 3044710CB1. Note: There are two sequences that have been assigned SEQ ID 2 in the specification, the present sequence represents the sequence given in
                                                                                                                                                                                                                                        figure 1.

HSPPs have anticancer, anti-inflammatory, antimicrobial, nootropic, hepatotropic, neuroprotective, cardiovascular and antiasthmatic activities, and can be used in gene therapy. HSPPs can be used to treat or prevent disorders associated with decreased activity or function of HSPP. Antagonists of HSPP are used to treat or prevent disorders associated with increased activity or function of HSPP. Such diseases include cell proliferation
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               New human signal peptide-containing proteins useful in treatment, prevention and diagnosis of e.g. cancer, inflammation and cardiovascular disease.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     YT, Gorgone GA, Corley NC, Guegler KJ, Baughn MR;

                                                                                                                                                                                                                                                                                                    ð
         reproductive or developmental disorders, (e.g. arteriosclerosis, cirrhosis, psoriasis, acquired immune deficiency syndrome, anaemia, asthma, Crohn's disease, microbial or other infections, congestive or ischaemic heart disease, Alzheimer's, Parkinson's or Huntington's diseases, schizophrenia, ovulatory defects muscular dystrophy). HSPP mucleic acids can be used for the recombinant production of HSPP, for detecting HSPP in standard hybridisation amplification assays (for diagnosis and monitoring), in gene therapy, as antisense, tripler-forming or ribozyme therapeutics, for detecting related sequences or genetic or ribozyme therapeutics, for detecting related sequences or genetic expecific antibodies (Ab) and to screen for agonists and antagonists (potential therapeutic agents). Ab are used to diagnose, or monitor, HSPP competitive drug screens, and for purification of HSPP from naturals

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   The invention relates to an isolated cDNA encoding a protein that is differentially expressed in breast cancer, designated PDEBC. The invention is useful to diagnose breast cancer. The invention is also useful to stage, treat, and monitor progression or treatment of breast cancer, particularly an invasive, metastatic stage of the disease. The presents sequence represents cDNA encoding human PDEBC Incyte 3044710CB1 Note: There are two sequences that have been assogned SEQ ID 2 in the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         A new cDNA encoding a protein differentially expressed in breast cancer designated PCBBC is useful to stage, treat, and monitor progression or treatment of breast cancer, particularly an invasive, metastatic stage of

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          à
                                                                                                                                                                                                                                                                                                                  AAX52213-74 encode secreted and transmembrane human proteins, and are obtained from cDNA libraries, prepared from fetal lung, fetal kidney, fetal liver and fetal retina. The encoded polypeptides have specific uses based on their homology to known polypeptides, e.g. PRO211 and PRO217 can be used for disorders associated with the preservation and mintenance of gastrointestinal mucosa and the repair of acute and chronic mucosal lesions (e.g. enterocolitis, 2011inger-Ellison syndrome, gastrointestinal ulceration and congenital microvillus atrophy), skin diseases associated with abnormal keratinocyte differentiation (e.g. vulva and gliomas), potent effects on cell growth and development, diseases related to growth or survival of nerve cells including cyloward also and the reaction of a saxing. PRO265 can be used as for fibromodulin, e.g. for reducing dermal scarring. PRO264 can be used as a target for anti-tumor drugs. PRO369 can be used in the treatment of Usher Syndrome or Atrophia areata; PRO269 can be used as an anti-thrombotic agent; PRO287 polypeptides and portions may have therapeutic applications in wound healing and tissue repair; PRO317 can be used for treating problems of the kidney, uterus, endometrium,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   279

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The present sequence is one of sixty one nucleic acids encoding novel secreted and transmembrane PRO polypeptides. The PRO polypeptides are useful for treating skin diseases (e.g. psoriasis), cancers (e.g. lung squamous cell carcinoma), gastrointestinal disorders (e.g. lung enterocolitis), neurodegenerative diseases (e.g. Alzheimer's disease, Parkinson's disease), wound repair, cardiovascular disorders (e.g. endometrial bleeding angiogenesis, ischaemias such as coronary ischaemia, atherosclerosis), inflammatory disorders (e.g. asthma, rheumatoid attritis, multiple sclerosis), infertility, AIDS and diabetes and retinal disorders such as retinitis pigmentosum. The PRO nucleic acids have applications in molecular biology, including use as hybridization probes, and in chromosome and gene mapping
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     279

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              9
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   80
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        molecular
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      t
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The present sequence is the coding sequence for a human PRO polypeptide (secreted and transmembrane). The PRO protein, and PRO agonists, PRO antagonists or anti-PRO antibodies are useful for preparation of a medicament useful in the treatment of a condition which is responsive to the PRO protein, agonists, antagonists or anti-PRO antibodies. The PRO protein may also be employed as molecular weight markers for protein electrophoresis. The PRO coding sequence has applications in molecular biology, including use as hybridisation probes, and in chromosome and

New isolated secreted and transmembrane PRO polypeptide useful for modulating biological activity of a cell, or for treating sports-related joint problems, osteoarthritis or rheumatoid arthritis.

2; Fig 5; 399pp; English. Claim

The invention relates to an isolated secreted and transmembrane PRO CC polypeptide having 80 % sequence identity to a sequence appearing as a polypeptide having 80 % sequence identity to a sequence of an extracellular domain of the proteins with their associated signal peptide. Associated signal peptide or lackfing its associated signal peptide. Associated signal peptide crise acids encoding the proteins, wetcrox, host cells, fusion proteins are acids encoding the proteins, bost cells, fusion proteins are caids encoding the proteins, vectors, host cells, fusion proteins are useful for detecting a polypeptide designated as A, B, C or D in a sample useful for detecting a polypeptide designated as B, B, C, Or D in a sample cample, where the formation of the Conjugate in the sample, where the formation of the Conjugate in the sample, where A is a PRO1972 polypeptide, B is a PRO2010 polypeptide, I is a PRO1975 polypeptide, B is a PRO2010 polypeptide, H is a conjugate in the sample, where A is a PRO1972 polypeptide, B is a PRO20040 polypeptide, H is a CC polypeptide, F is a PRO1975 polypeptide, B is a PRO20040 polypeptide, H is a coll suppering by a propering and I is a PRO1976 polypeptide. The sample comprises a cell suppering a polypeptide designated as A, B, C or D or E, F, G, H or I polypeptide is labeled with a detectable label or is attached to a cell expressing the A, B, C or D polypeptide or an antibody. The bioactive molecule is a toxin, a radiolabel or an antibody. The bioactive molecule is a toxin, a radiolabel or an antibody. The bioactive molecule is a toxin, a radiolabel or an antibody. The bioactive molecule is a toxin, a radiolabel or an antibody. The bioactive molecule is a toxin, a radiolabel or an antibody. The bioactive molecule is a toxin, a radiolabel or an antibody. The bioactive molecule is a toxin, a radiolabel or an antibody or cell expressing a polypeptide designated as A, B, C or D or C F, G, H, or I. The cell is Rilled. The proteins are useful for modulating a polypeptide or an antidate o development and screening of therapeutic useful reagents, for chromosome dentification, and in gene therapy. The antibody is useful as a therapeutic agent, in a diagnostic assay and for affinity purification of the protein from recombinant call culture natural sources. The present sequence encodes a novel secreted or transmembrane protein of the nvention

Human PRO263 cDNA sequence SEQ ID NO:31

(first entry)

16-MAY-2002

```
ABL08072 to ABL080258 encode the PRO proteins given in ABB04817 to ABL0805003. The PRO proteins and polynucleotides have cardiant, cytostatic, antiangiogenic, hypotensive, vulnerary and antiarteriosclerotic activities, and can be used in gene therapy. The PRO polynucleotides,
Human; angiogenesis; cardiant; cytostatic; antiangiogenic; hypotensive; vulnerary; antiarteriosclerotic; PRO agonist; PRO antagonist; trauma; gene therapy; cardiovascular disorder; endothelial disorder; cancer; angiogenic disorder; cardiac hypertrophy; atherosclerosis; hypertension; age-related macular degeneration; arterial restenosis; angina; theumatoid arthritis; myocardial infarction; thrombophlebitis; lymphangitis; tumour angiogenesis; breast carcinoma; liver carcinoma; wound healing; chromosome mapping; gene mapping; gene; ss.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    NF;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   One hundred and eighty seven nucleic acids encoding PRO polypeptides, useful in diagnosis and treatment of cardiovascular (e.g. myocardial infarction), endothelial or angiogenic disorders in a mammal.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Paoni

                                                                                                                                                                                                                                                                                                       ð
                                                                                                                                                                                                                                                                                                                                              g
                                                                                                                                                                                                                  ठ
                 a cardiovascular, endothelial or angiogenic disorder in a mammal, e.g. cardiovascular, endothelial or angiogenic disorder in a mammal, e.g. atherosclerosis, hypertension, arterial restenosis, rhumatoid arthritis, angina, myocardial infarctions, thrombophlebitis, lymphangitis, tumour angiogenesis (such as breast carcinoma and liver carcinoma) and wound healing. The PRO polymucleotides have applications in molecular biology, including use as hybridisation probes, and in chromosome and gene mapping. ABL88259 to ABL88267 represent primers and probes used in the exemplification of the present invention
